

JOHN D. SHORT II

WEB | APP DEVELOPMENT | CREATIVE DESIGN | FULL STACK

SKILLS AND KNOWLEDGE

My major skillset deals directly with computer and network systems, particularly front-end Web/app development, UX, graphic design, and content management.

I have over 20+ years of experience with Windows, Mac OS, Linux and other alternatives, Adobe CC (Photoshop, Illustrator, InDesign), & other video/multimedia suites and DAWs, all alongside the Web.

I have created software and websites since I was young, using languages from **Visual Basic** to **Java**, and most recently **C++/C#**, **Objective C**, and **Swift**.

I am well versed in **HTML5**, **CSS3**, and **JavaScript** as well as frameworks like **jQuery**, **Angular**, and **React**, and CMS's such as **Drupal**, **WordPress**, and **Joomla**.

I've recently been trained with **ArcGIS** and other geographic/geospatial information systems software; began working with **Python**, **GML**, and **Unity**; and am currently studying functional programming, on top of managing multiple **social media** platforms.

EXPERIENCE

STUDYRANGE • STUDYRANGE.COM

In collaboration with Strictly Business Computer Systems, I designed a landing page for a local education startup called Studyrange, listing their features and pricing model using Bootstrap and HTML/CSS/JS.

BOYS & GIRLS CLUB OF HUNTINGTON • BGCHUNTINGTON.ORG

The Boys & Girls Club of Huntington needed a site redesign after a recent restructuring. Using national brand guidelines for the Boys & Girls Club, I created a simple landing page with social media and donation links using the Weebly platform.

(Experience section continued on page 2)

EDUCATION

ASSOCIATE OF APPLIED SCIENCE, INFORMATION TECHNOLOGY, WEB DESIGN AND DEVELOPMENT • DECEMBER 2017
MOUNTWEST COMMUNITY & TECHNICAL COLLEGE, HUNTINGTON, WV
GPA of 3.4 (Dean's List)
Member, Phi Theta Kappa Honor Society

A+ CERTIFICATION, COMPTIA
CABELL COUNTY CAREER TECHNOLOGY CENTER, HUNTINGTON, WV
Earned A+ Certification in joint program with Huntington High School.

EXPERIENCE (CONTINUED)

WEST VIRGINIA GAME DEVELOPERS' EXPO • WVGAMEDEVEXPO.COM

I was hired to do a major redesign for the WV Game Developers Expo website before their inaugural event. Utilizing Drupal, I built a content management system with a simple yet elegant mobile responsive theme that was modular and easily updateable. I also suggested, created and formatted content for the site.

ESCAPE 2017 • ESCAPE-WV.COM

HealthNet Aeromedical Services required a website for their annual fire/EMS/nursing conference that included easily searchable information about each session they were hosting. Using a special conference themed distribution of Drupal, I designed a mobile-first site and scheduling system for attendees to use to organize their day.
